Summary

Frontend Developer with over 1 year of experience building responsive, high-performance web applications using JavaScript, React.js, and Redux. Successfully improved user engagement by 25% by optimizing state management and enhancing navigation in a dynamic shopping cart project. Skilled in designing modular frontend architectures and delivering intuitive user experiences that reduce bounce rates and boost satisfaction. Proficient in Bootstrap, Context API, and Express.js, with a strong focus on clean code, component reusability, and performance optimization. Adept at collaborating in Agile teams to translate UI/UX designs into interactive, scalable interfaces.

Skills

React JS | Redux Toolkit | Context API | JQuery | JavaScript | Node | Express | MongoDB | HTML | CSS | Tailwind css | Bootstrap | SCSS

Work Experience

Frontend Developer

Meon Technology

- Improved user experience through performance-focused strategies, resulting in **20%** increase in session duration and **35%** boost in user interactions, driving **engagement** and **retention**.
- Improved React.js app performance through **optimization** techniques, **resulting in 30%** faster task completion, **25%** faster load times, and enhanced user satisfaction.
- Improved **cross-browser compatibility** by integrating React.js and Bootstrap, resolving **30%** of user-reported issues and enhancing development efficiency.
- Spearheaded a high-impact React.js team project, resulting in a **40% increase in feature adoption** and attracting **10,000+** users within the first month.
- Utilized problem-solving skills to address UI/UX challenges, resulting in **25%** improved usability and enhanced user feedback ratings through effective resource allocation and strategic planning.
- Streamlined frontend development with **Redux** and modern tools, tackling **25% reduction in project timelines** while maintaining app speed and reliability.

Projects

LangarSewa (PWA Application for Janhit Sewa Charitable Trust)

Developed a Progressive Web Application (PWA) called LangarSewa for Janhit Sewa Charitable Trust, designed to streamline sewa (service) coordination, attendance tracking, and community interaction for NGO members.

- Developed a **user authentication system** with **admin-based approval flow**—users can only access the system after admin activation, ensuring secure access control.
- Built an **Admin Dashboard** with full CRUD control over members, attendance, donations, and expenses.
- User can see View personal and group **attendance and donation history, and** track **monthly and yearly performance metrics**
- Enabled users to post **complaints, suggestions, suvichar (inspirational quotes), and messages** in a shared **notice panel**.
- Allowed users to **edit their profiles**, including photo, email, mobile number, and address.

Education

Bachelor of Business   2019 - 2022

IMS Ghaziabad

Intermediate   2018 - 2019
